Peter Pancza

Full-stack web developer · Szeged, Hungary

pancza.peter@gmail.com · peterpancza.com · github.com/zgfun · linkedin.com/in/péter-pancza

Full-stack web developer. One year at COMET studio as the only developer on a three-person team, building client webshops, dashboards, subscription systems and automations in Next.js, TypeScript and Node, and handling the deployments. Computer Engineering student at BME. Recent work includes LLM-based tools and a small ML model. I learn fast and settle into a team quickly.

EXPERIENCE

Developer, COMET studio

Oct 2025 – Oct 2026

- Only developer on a team with two designers; shipped 70 client projects in one year: webshops, dashboards, subscription systems, automations and landing sites, mostly on a shared Next.js and WordPress stack.
- Owned builds, releases and infrastructure: CI/CD, Docker, Linux servers and cloud deployments.
- Ported static client sites to Next.js + Chakra UI with custom admin panels, Postgres (Drizzle) and transactional email.
- Maintained a fleet of 50+ production WordPress sites: legal pages, cookie consent, SEO hygiene and monitoring.

PROJECTS

Blunder explainer

blunder-explainer.vercel.app/sample

Stockfish in the browser finds the worst moves of a chess game, Claude explains each one, grounded in the engine line.

Next.js · Stockfish WASM · Claude API · code: github.com/zgfun/blunder-explainer

Fleet monitor

fleet-monitor-lovat.vercel.app/demo

Uptime, SSL expiry, Lighthouse and broken-link checks for a fleet of sites, with history and alerts. Built to watch the 50+ WordPress sites I maintained at COMET studio.

Next.js · Postgres · Vercel Cron · Resend · code: github.com/zgfun/fleet-monitor

Training log

training-log-three-gamma.vercel.app/demo

Estimated one-rep max and a small backtested model that predicts next week's working weights.

FastAPI · Python · numpy · Next.js · code: github.com/zgfun/training-log

Subscription billing starter

subscription-billing-starter.vercel.app

Next.js + Stripe with replay-safe webhooks, trials, plan changes and a customer portal, with tests.

Next.js · Stripe · webhooks · Vitest · code: github.com/zgfun/subscription-billing-starter

EDUCATION

BSc Computer Engineering

in progress

Budapest University of Technology and Economics (BME)

SKILLS

Frontend	Next.js, React, TypeScript, Chakra UI, Framer Motion, CSS
Backend	Node.js, REST APIs, auth, Postgres (Drizzle), Stripe, webhooks, WordPress
DevOps	CI/CD, Docker, Linux servers, Vercel and cloud deploys, monitoring
AI / ML	LLM integrations with an evaluation set, applied ML (Python, numpy, FastAPI)
Testing	Vitest, Stripe test clocks

LANGUAGES & INTERESTS

Hungarian (native), English (C1). Lifting, chess.
